DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 16-18, drawn to a method, classified in class 219, subclass 83.
 - II. Claims 11-15 and 19-20, drawn to an apparatus, classified in class 219, subclass64.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be done manually by an operator.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with Mr. Richard Getz on July 8, 2002 to a provisional election was made with traverse to prosecute the invention of group II, claims 11-15, and 19-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-10 and 16-18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1725

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

DETAILED ACTION

Claim Rejections - 35 USC § 112

6. Claims 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 11, the term "and if required" in line 1 is vague since it does not provide a positive limitation. In line 3, the term "that can be" does not provide a positive limitation.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claims 11-13 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Matteson (US 5,676,862) or Baumgartner (US 5,841,094) or Grau et al (US 5,391,853).

Page 4

Art Unit: 1725

Matteson, Baumgartner, and Grau et al disclose a welding apparatus with welding electrode rollers with a welding current source, AC welding current source, and current source connected to the electrodes by a controllable switch arrangement. The switch arrangement connected to the control device provided to trigger by the position with respect to the welding electrode rollers of the forward or rear edge. The control device is configured to receive a signal indicating the position of the electrode to the article and releasing the welding current to the electrode rollers. The switch means includes a pivotally mounted arm for mounting at least one of the rollers (figure 2, col. 2, lines 28-31, col. 4, lines 35-67, col. 5, lines 1-50 of Matteson), (figure and col. 2, lines 66- col. 3, 1-64 of Grau et al), and (figures and col. 2, lines 60-col. 3, lines 1-19 of Grau et al).

Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 1725

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matteson (US '862).

Matteson discloses the claimed invention above in paragraph 8, but fails to teach setting arrangement having a disk with plurality of regions of different thickness.

However, Matteson discloses the method of engagement of the workpiece by either mechanical or position sensor using levers.

Therefore, it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to provide a disk with different thickness to indicate the position of the rollers, since such device is functionally equivalent with the position sensor of Matteson.

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (703)605-1175. The examiner can normally be reached on M-F, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 703-308-3318. The fax phone numbers for the organization where this application or proceeding is assigned are (703)305-3602 for regular communications and (703)305-3602 for After Final communications.

Art Unit: 1725

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-0661.
